EXAMINER'S AMENDMENT

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

The application has been amended as follows: (a) claim 21, line 10, the word "lower" should be changed to "lowered" for consistency.

REASONS FOR ALLOWANCE

2. The following is an examiner's statement of reasons for allowance. The prior art made of record considered as a whole neither shows, nor renders obvious the overall combination of a reduced lubricant accumulating slider including (as per claim 1) a first air bearing surface, a second air bearing surface, a center portion (as a center air bearing surface) located between the first and second air bearing surfaces; a first and second streamline control element for limiting stagnation and flow reversal located adjacent the trailing edge and at least partially between the first (or second) air bearing surface and the center portion (respectively), such that the first and second streamline control element function to also reduce lubricant accumulation and are located rearward of the longitudinal centerline; claim 21 is allowable for similar reasons and also recites that the first and second streamline control elements are isolated from other structure. Claims 12-14 were previously addressed.

Art Unit: 2627

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Election/Restrictions

3. Claim 1-14, 21-26 are allowable. The restriction requirement, as set forth in the Office action mailed on 11/26/03, has been reconsidered in view of the allowability of claims to the elected invention pursuant to MPEP § 821.04(a). **The restriction requirement is hereby withdrawn as to any claim that requires all the limitations of an allowable claim.** Claim 10, 11, 26, directed to a different species are no longer withdrawn from consideration because the claim(s) requires all the limitations of an allowable claim. In view of the above noted withdrawal of the restriction requirement, applicant is advised that if any claim presented in a continuation or divisional application is anticipated by, or includes all the limitations of, a claim that is allowable in the present application, such claim may be subject to provisional statutory and/or nonstatutory double patenting rejections over the claims of the instant application.

Once a restriction requirement is withdrawn, the provisions of 35 U.S.C. 121 are no longer applicable. See *In re Ziegler*, 443 F.2d 1211, 1215, 170 USPQ 129, 131-32 (CCPA 1971). See also MPEP § 804.01.
